

Quickly and Efficiently Connecting Investors to Companies

OneMedPlace drives traffic to the Global Database where member companies are professionally profiled, packaged, presented, and easily accessed by investors, customers, and strategic partners. OneMedPlace, OneMedForum websites, the weekly Sentinel, search results, and research reports all link to profiles of firms in the Global Database. The net result is a highly efficient means to quickly understand and learn about companies and technologies.

Description: Clariant provides advanced anatomic pathology and molecular testing services for pathologists, oncologists and the pharmaceutical industry. It specializes in comprehensive cancer diagnostic services, including: diagnosis of solid tumors, as well as leukemia and lymphoma, cancer sub-typing, patient classification into prognostic categories (i.e. low, medium and high risk groups), identification of the optimal drug and therapy strategy for individual patients, and monitoring of patients undergoing therapy.

Products / Services: Clariant's fully licensed state-of-the-art advanced cancer laboratory provides full, comprehensive laboratory services that include in-house pathology testing using cutting-edge diagnostics. The company's Bioanalytical Service group (a team of prominent scientists and assay development specialists) offers tools and resources to support specialized investigative efforts. Clariant is also engaging in collaborative partnerships with major pharmaceutical companies to help develop their leading drug candidates.

Technology / Differentiation: Clariant's diagnostics spans the full spectrum of cellular analysis, including: protein identification by immunohistochemistry, DNA and RNA analysis using molecular PCR and in situ hybridization, and cellular categorizing by flow cytometry.

Market / Customers: Clariant has reported that the market for advanced cancer diagnostic testing will increase to over \$3.0 billion by 2012. This increase is
